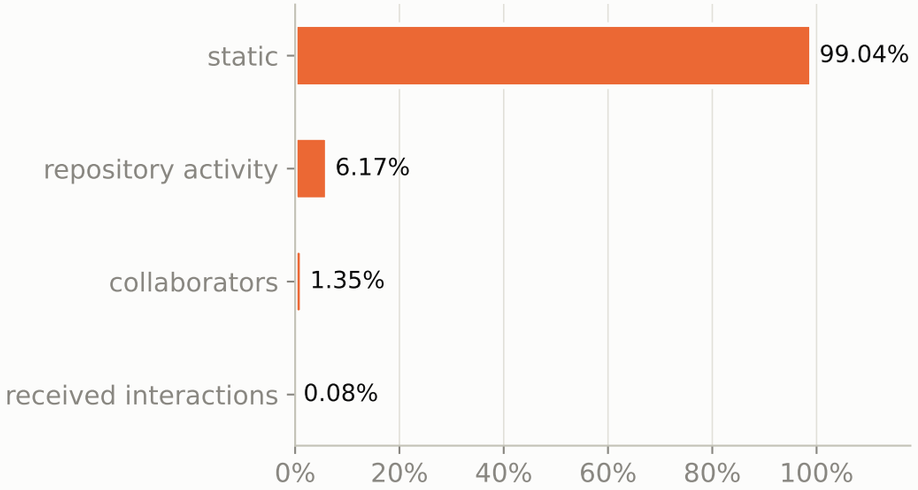
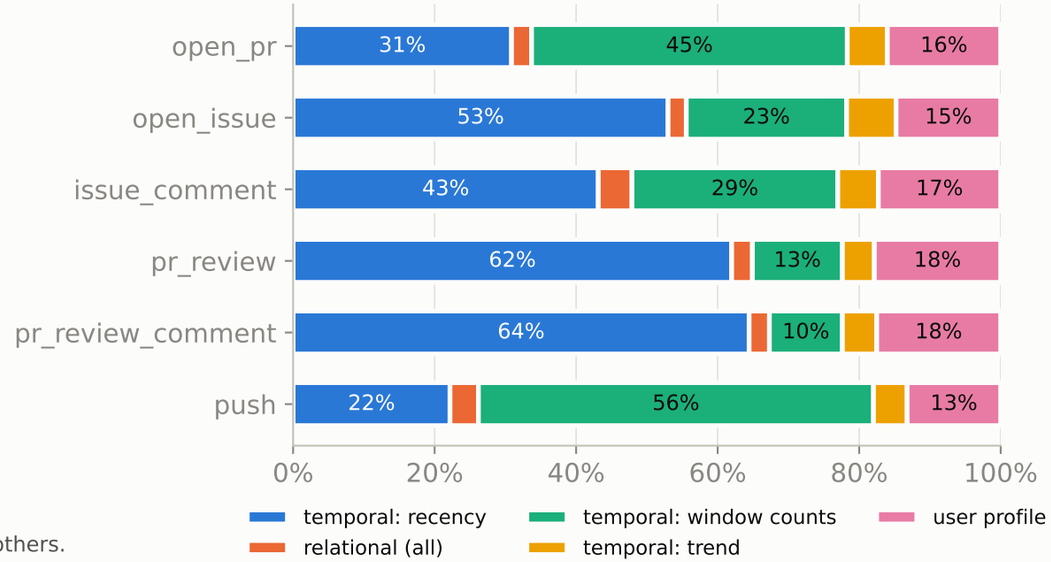
Why relations add little here: the cohort-only data rarely contains other people's replies

Users with a non-zero feature (week 10/22)



Cohort closure: of 10,524 comments on cohort-authored threads,
only 40 are by someone else; of 2,542 reviews on cohort PRs, 41 by others.


Share of LightGBM gain by feature family (submitted model; relational 3%–5%)
